CORRECT INSTALLATION OF
WOOD SLATS ON BED BASE

STEP 9

STEP 10

ATTENTION Important Notes Regarding Gas Lifts

This information applies to all types of gas lift storage, regardless of the base top: boarded base **1** or wooden slats **2** and regardless of opening configuration: end opening **1** / side opening **2**

NEVER OPEN OR CLOSE WITHOUT A MATTRESS ON TOP OR YOU RISK TWISTING THE FRAME, DAMAGING THE BED OR PERSONAL INJURY!

TO OPEN, USE
SAFETY STRAP(S)
TO LIFT THE MATTRESS

3 ONCE THE MATTRESS IS ON TOP,
YOU CAN OPEN & CLOSE
THE BED SAFELY ✓

Once all the nuts and bolts are tightened firmly, the first time you close the lifting mechanism, push down with extra pressure to force open the seals on the pistons.

This will feel like a lot of pressure, so be firm and it will close!

1. NEVER operate without a mattress on top. Failure to do so will damage the bed.
2. Close by pushing down firmly, with both hands towards the centre, with equal pressure.
3. NEVER push down on only one side or edge, or you will damage your bed.
4. NEVER sleep on the bed frame without a mattress.
5. Please remember to re-tighten all nuts & bolts within the bed frame after 2 weeks of use.
