	(H)	8

10

step a : Install the handle (C) on the door , using Screws (H).
 step b : install Hinges (D)x2 onto door , using Screws H.

	(C)	1
	(H)	6

11

12

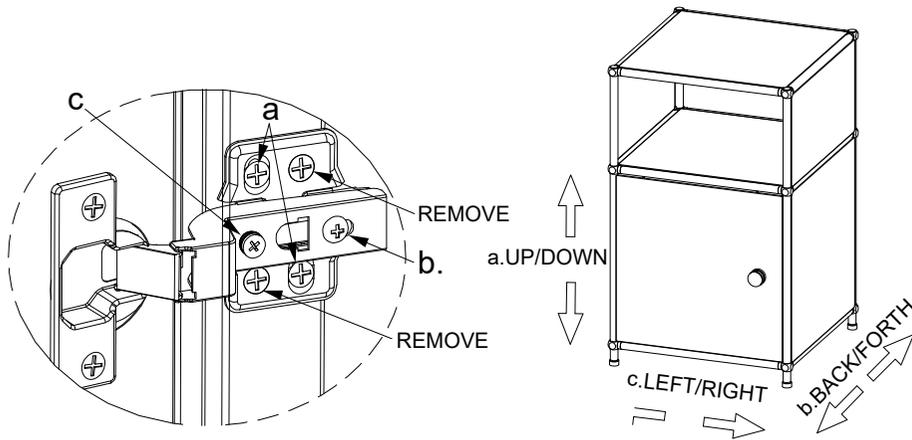

13

Adjust the feet (B) as need.

levelling

14

15 If the door is not closing completely, adjust the feet B as needed, ensure that the furniture is square and level for proper door closure.
 (*Use a spirit level if needed).
 In rare cases, the door may need to be aligned.

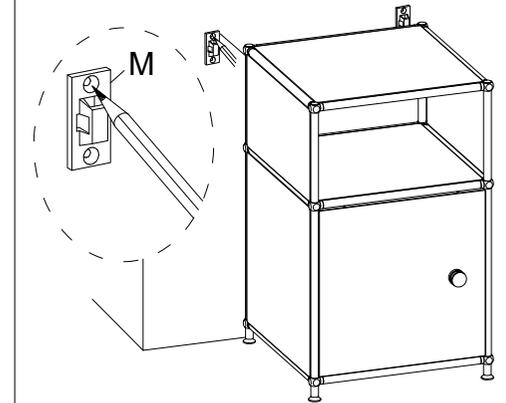

a: Up/Down adjustment. Remove the 2 screws pointed out in the diagram on both hinges. Loosen the two screws in the slotted hole slightly so the door is able to just slide up or down. Retighten these two screws when the correct height is found. The removed screws can be omitted.

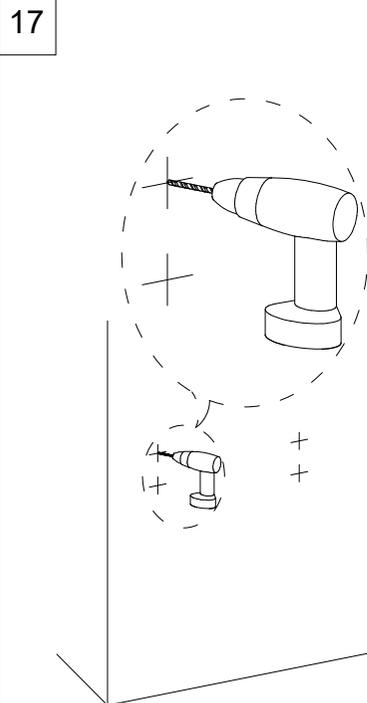

b: Back/Forth Adjustment. Loosen screw b on both hinges until the hinge can move forward or backward. Do not remove screw completely. Tighten screws once desired position is found.

c: Left/Right Adjustment. Adjust the door horizontally by turning screw c. Turn the screw clockwise to move the door to the left and counterclockwise to move it to the right. Turn the same rotation on both hinges.

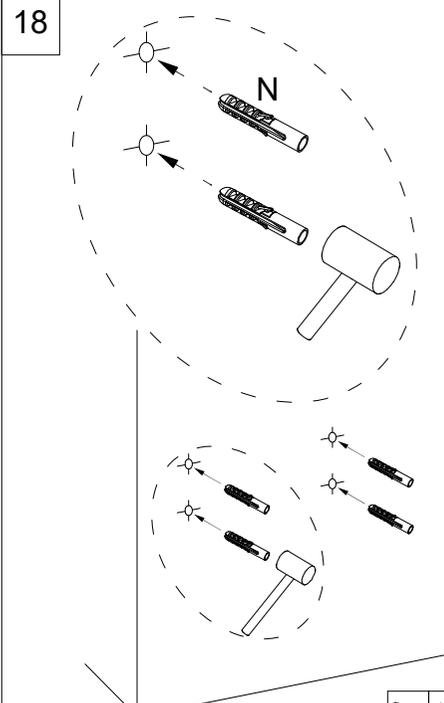

16 Anchoring advice: ensure the appropriate mounting screws and method are used based on the specific wall type.
