2077031

Bei nicht vorschriftsmäßiger und/oder nicht fachmännischer Montage wird bei Personen- und/oder Sachschäden keinerlei Haftung übernommen.

Aufbauanweisung (assembly instructions)

Concealed Hinges Damping Adjustment

Concealed Hinges Adjustment

Adjustment range can be found on the product pages.

Damping Adjustment

T-type-i

The damping action can be adjusted to fit different door weights and sizes which enables optimal door functioning.

Damping is factory pre-set to the medium damping value. Turn towards '+' to increase and '-' to decrease the damping.

Concealed Hinges

Side Adjustment

Side adjustment aligns the door with the side of the cabinet.

By rotating the adjustment screw

- T-type
- S-type
- B-type

Side adjustment is made by rotating the screw on the hinge arm.

By temporarily loosening the fixing screw

- For the side adjustment:
1. Release the fixing screw
 2. Make the necessary adjustment by rotating the appropriate screw
 3. Tighten the fixing screw
- Without releasing the fixing screw no side adjustment is possible.

- Wide angle hinge 270°
- Refrigerator cabinet hinge

Concealed Hinges Adjustment

Height adjustment is necessary to achieve optimal vertical door position.

By rotating the cam adjuster

Height adjustment is made by rotating the cam adjuster on the mounting plate.

- T-type cruciform mounting plate
- S-type with cam adjustable cruciform mounting plate

- T-type with cam adjustable horizontal mounting plate

By releasing the fixing screws

For height adjustment the two mounting plate fixing screws have to be temporarily released while making the manual adjustment.

- T-type, S-type and B-type with cruciform mounting plate
- Wide angle hinge 270°
- Refrigerator cabinet hinge

Concealed Hinges Adjustment

Depth Adjustment

The system enables easy adjustment of the gap between door and cabinet.

By rotating the cam adjuster

Rotate the cam adjuster on the hinge arm.

- T-type

By releasing the fixing or adjustment screw

The depth adjustment is made by temporarily releasing the adjustment screw (S-type) or fixing screw (B-type). After the adjustment is made the screw has to be re-tightened.

- S-type
- B-type
