EN If the doors are not aligned, begin by loosening the screws on the back panel and then adjusting the height of the adjustable feet. This enables you to slightly alter the structure and align the doors. If the center appears slightly sunken, turn the adjustable foot of the center leg so it raises the center as needed. Once the doors are aligned, remember to retighten the screws on the back panel to secure the structure.

DE Wenn die Türen nicht korrekt ausgerichtet sind, lösen Sie zunächst die Schrauben an der Rückwand und stellen Sie dann die verstellbaren Füße ein. Wenn der mittleren Bereich des Schranks leicht abgesunken ist, können Sie den verstellbaren Fuß in der Mitte verstellen. Nachdem die Türen korrekt ausgerichtet wurden, ziehen Sie die Schrauben an der Rückwand an.

FR Pour aligner les portes, desserrez les vis du panneau arrière et ajustez la hauteur des pieds réglables. Si le centre semble enfoncé, tournez le pied réglable au milieu pour le relever si nécessaire. Après l'alignement des portes, resserrez les vis du panneau arrière pour sécuriser la structure.

IT Quando le ante non sono allineate, si può allentare le viti del pannello posteriore e regolare i piedini; quando il centro è leggermente affondato, è possibile regolare il piedino regolabile al centro del fondo, quindi bloccare le viti del pannello posteriore dopo che le ante sono allineate.

ES Cuando las puertas no están alineadas, puede aflojar los tornillos del panel detrás y ajustar los pies; cuando el centro está ligeramente hundido, puede ajustar el pie ajustable en el centro de la parte inferior, y luego bloquear los tornillos del panel detrás después de que las puertas estén alineadas.

NL Als de deuren niet uitgelijnd zijn, kunt u de schroeven van het achterpaneel losdraaien en de voetjes afstellen; als het midden iets verzonken is, kunt u de verstelbare voet in het midden van de bodem afstellen en vervolgens de schroeven van het achterpaneel vastzetten nadat de deuren uitgelijnd zijn.

SE När dörrarna inte är i linje kan du lossa skruvarna på bakpanelen och justera fötterna; när mitten är något nedsänkt kan du justera den justerbara foten i mitten av botten och sedan låsa skruvarna på bakpanelen när dörrarna är I linje.

PL Gdy drzwi nie są wyrównane, można poluzować śruby panelu tylnego i wyregulować nóżki; gdy środek jest lekko zagłębiony, można wyregulować regulowaną nóżkę na środku dna, a następnie zablokować śruby panelu tylnego po wyrównaniu drzwi.

TR Kapılar hizalanmadığında, arka panel vidalarını gevşetebilir ve ayakları ayarlayabilirsiniz; merkez hafifçe çöktüğünde, ayarlanabilir ayağı tabanın ortasına ayarlayabilir, ardından kapılar hizalandıktan sonra arka panel vidalarını kilitleyebilirsiniz.
