

CUZCO

Lampshade

Made of jute, biodegradable, handmade.

Jute is a natural, bark fiber obtained from the stem of the jute plant. The plants are rain-fed and have little need for fertilizers/ pesticides in contrast to cotton. The long fibers are spun into coarse, strong threads and can also be woven into fabric form. Jute is a versatile material and fully biodegradable.

Additional information

This lamp shade is hand woven on location in Vietnam, providing work and income for the local community.

Tip

If shade does not hang straight adjust as follows;

- loosen socket-ring inside shade,
- move socket on top of shade in correct position,
- fix socket-ring inside shade again.

Packaging

Wall/ceiling system and lampshade packed separately.

Warning!

To avoid overheating always use LED light bulbs. Never use incandescent light bulbs.
