

THE SMEG SODA MAKER: A SIMPLE SOLUTION FOR DAILY PLEASURE

Smeg presents a new addition to the range of small household appliances: the **Soda Maker**, a combination of elegance and innovation, designed for those who want a refined and functional product. With sophisticated lines and compact dimensions, it integrates harmoniously into any environment, offering a touch of style with **four exclusive matt finishes**: matt white, matt black, matt emerald green and matt storm blue.

The most innovative element is its exclusive carbonation **control knob**, which integrates perfectly with the product design. This intuitive system allows you to adjust the CO₂ level, allowing you to **customise each drink** according to the user's tastes. The drip tray, with magnetic closure, ensures that use is always mess-free.

The 800 ml **bottle** is made of **Tritan™ Renew**, an innovative plastic with **50% recycled content**, resistant, transparent and dishwasher safe. Furthermore, thanks to the possibility of reusing the bottle, Smeg contributes to reducing the consumption of disposable bottles, promoting a more sustainable lifestyle and responsible consumption.

Compatible with most screw-on CO₂ cylinders, the Soda Maker stands out for being lightweight and practical, proving to be a versatile solution for those who love to enjoy sparkling drinks anywhere, without the need for any installation.

The Smeg Maker combines a unique design with technology designed to improve everyday life. It is perfect for those looking for an object that combines beauty and practicality, to be enjoyed in company for a personalised and sparkling experience.

SMEG

Founded in 1948, SMEG, whose name is the acronym of "Smalterie Metallurgiche Emiliane Guastalla", is a proudly Italian company now in the third generation of the Bertazzoni family.
