

3-in-1 NEWLY Kinderkraft pushchair

This is NEWLY - a modern **3-in-1 pushchair for children up to 22 kg, i.e., up to about four years old**, which will delight you with its functionality and lightweight. It is **one of the lightest multi-functional models** on the international market - it weighs only 7.5 kg, which makes it extremely easy to manoeuvre. **It has a 2-in-1 seat** that you can easily change from a carrycot to a stroller with just a few moves. Thanks to **large shock-absorbing wheels**, you can easily move even in crowded streets or on park paths.

NEWLY **folds together with the attached seat** - you need just a moment to prepare the pushchair for transport. It comes with a **MINK PRO i-Size car seat (40-75 cm) and versatile adapters***, thanks to which you can easily attach the car seat to the pushchair frame. Thanks to this, you won't have to wake your baby when he/she falls asleep while travelling by car.

Lightweight and multi-functional

The NEWLY 3-in-1 pushchair has been created to help you care for your child from birth to around four years. Despite many elements, NEWLY is one of the lightest multi-functional pushchairs available on the market.

Easy folding

You can fold the stroller together with the seat in a few moments. Need to go on a trip? Or maybe you have to climb stairs every day? No problem - one moment, and NEWLY is ready to go. It is a pushchair created for storage - even in small apartments.

From birth to 22 kg

The NEWLY pushchair is designed for children from birth up to 22 kg. It has a 2-in-1 seat that you can quickly transform from a carrycot into a front-facing or rear-facing stroller. Thanks to this function, you do not have to use a separate space for storing the carrycot when your little one grows out of it.

Possibility to attach the seat to the frame

Thanks to the possibility of attaching the seat to the pushchair frame, you will be able to go with your baby for a walk or go home, even when they fell asleep during a car trip. Versatile adapters* are included.

Wheels that don't need to be air-filled

The shock-absorbing wheels are puncture-resistant and - most importantly - do not need to be air-filled. They are always ready for a walk! The front wheels rotate 360 degrees and have a lock to ride straight, ideal for more challenging terrain. With them, you will overcome any obstacle.

Large, waterproof hood

NEWLY is a multifunctional pushchair, perfect for going for a walk at any time of the year. It has a large hood with an additional sun shade, a window for viewing the child, and a ventilation panel. It is made of waterproof material with a UPF50+ filter - it protects the child not only from wind and rain but also from harmful UV rays.

Practical accessories:

You don't have to buy any accessories separately for NEWLY: everything is included! The pushchair includes foot moof, rain cover, versatile adapters*, and a MINK PRO i-Size (40-75 cm) car seat.

Wide adjustment range

NEWLY is a pushchair adapted to both the child and the parent. You can easily adjust the backrest to create a comfortable space for your toddler to nap outdoors. In addition, an adjustable handle of the NEWLY pushchair allows you to adjust it to the height of the parent pushing the pushchair.
