1、3D Convection Pro+

With the professional heat circulation system hidden at the rear, and the upper and lower heaters combined together, the 3D Convection Pro+ technology can distribute hot air to every corner of the cavity. Heat can penetrate evenly and thoroughly into the food, which gives the food a more delicious looking and taste. The result is: crispy outside, moist and juicy inside.

2、Multi-Grilling

The new cooking style will open another world of flavors to tantalize your taste buds. Choose “Double Grill with Fan” mode, strong heat will surround the food immediately, preserving the meat juice while crisping the surface like traditional charcoal barbecue. Choose “Double Grill” mode, you can easily grill large quantities of tasty food for your family. Choose “Grill-small” mode, enjoy yourself in a delicious crispy journey.

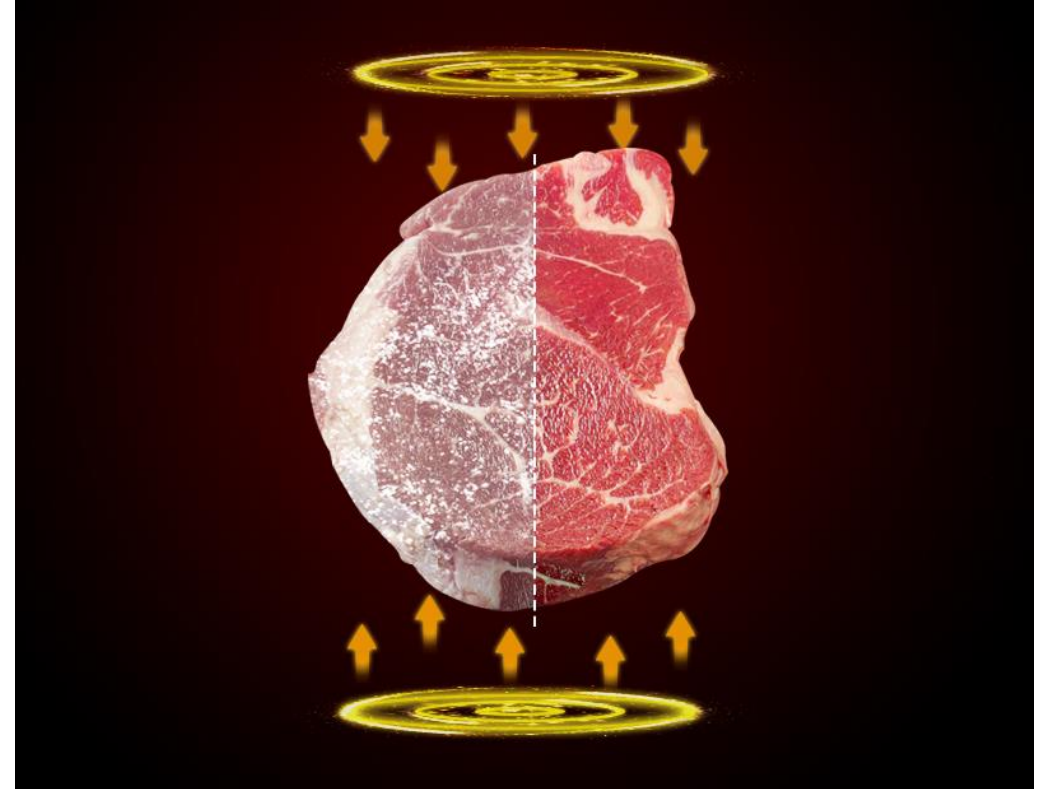

3、ECO Mode with Recipes

For ECO Mode, the energy consumption is reduced with the same great performance. Besides, we provide three ECO recipes for your convenience: Potato Cheese Gratin, Cheese Cake, and Meatloaf. These recipes may satisfy your appetite while saving energy.

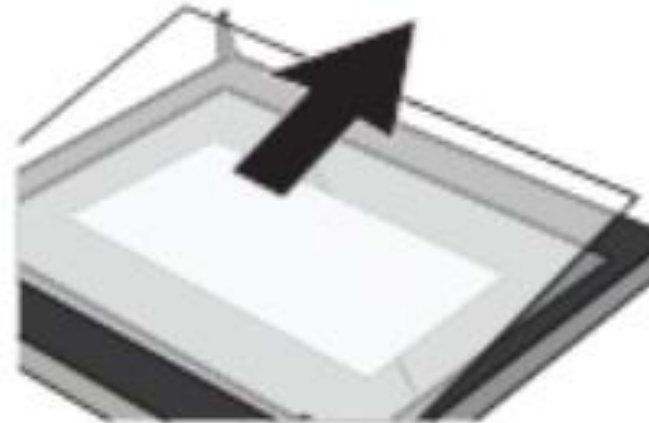

4、 Air Defrosting

The circulation of air at room temperature in the oven simulates the natural fresh air defrosting process, which enables quicker thawing of frozen food with even results. The situation of frozen centers and overcooked edges will be avoided. It's a gentle but quick way to speed up the defrosting time and the thawing of ready-made dishes.

5、 Easy Clean Enamel Cavity & Removable Door

The enamel cavity is easy to wipe clean and scratch resistant. The durable enamel interior provides a polished surface that is easy to maintain. No effort is needed to remove grease and odor. Moreover, the removable door glass can be simply detached without special tool and cleaned easily.

6、Considerate Design

The UI design is considerate and easy to be understood. You can easily select the cooking function, the cooking time, and the cooking temperature without arduous operation. You can also observe the process of cooking without opening the door with our oven lamp and the large window. The 2-layer flat glass door guarantees your safety by insulating the heat.
