Weight: 0.10 kg

KEY FEATURES

ONE-HAND INSTALLATION

Immerse your children in family activities by converting your LEMO Chair into the LEMO Learning Tower in seconds and without the need for tools with this ingenious accessory. It slips effortlessly into the backrest of your LEMO Chair and two clicks later your Learning Tower Set is ready for use. Simply reverse the process to immediately get your LEMO Chair back and with no need to store away a bulky product.

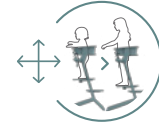

ELEVATED EXPLORATION

The LEMO Learning Tower Set's ingenious design emboldens toddlers and young children to participate in everyday chores and helps develop a sense of independence through stimulating, analytical tasks. The ability to explore their home environment and interact with their siblings or parents at their height will foster social interaction, confidence and increase dexterity.

OPTIMUM STABILITY

Stability is the key to safety and this is where the LEMO Learning Tower Set excels. Its clever, contemporary design transfers all the weight to the lower part of the LEMO Chair, ensuring stability, whilst in the upper part, the protective ring also supports your child's back. Anti-slip Silicone mats on the seat board and the footrest provide extra grip when your child is standing or climbing onto the tower unaided.

ADAPTS WITH AGE

As your child grows from 1 to 5 years old, so too can your Learning Tower Set. Effortlessly adjust the height and depth of the seat plus the footrest's height on your LEMO Chair with one hand to give your child all the legroom they need to move freely and to have them at the right height for them to climb onto or off. Always providing the most stable posture position and all without the need of a single tool.

Compact Size

Space is always at a premium and this is where our LEMO Learning Tower Set comes into its own. This accessory can quickly be folded with one hand and is compact enough to allow for easy storage when not in use, letting you convert your LEMO Chair at will and removing the need for a separate standalone product.

Color Match

The LEMO Learning Tower Set is available in five eye-catching colors, making it easy to color-coordinate with your LEMO Chair.

Anti-Slip Mats

Two color-matching Silicone mats on the seat board and footrest of your LEMO Chair invisibly provide that extra grip needed to ensure stability and confidence.

Free to Roam

The LEMO Chair's wheels on the rear legs mean the LEMO Learning Tower can effortlessly be moved around, bringing your child closer to family activities or making it easier to do chores. A must for all explorers who need to broaden their horizons!

Bolster Self-Esteem

Once the seat and footrest have been adjusted to suit, they ingeniously become stairs to allow children of all ages to climb onto or off the Learning Tower all by themselves, developing self-reliance and giving them the freedom they crave.

LEMO LEARNING TOWER SET

INTRO TEXT

Öko-Test rated and ultra-smart, our ergonomic highchair innovation LEMO is perfect for every stage in life. The LEMO product family offers a sustainable choice that grows with your baby. Simply use the matching attachments for your child's age and the LEMO Chair can be used from birth until 99 years. Our LEMO Learning Tower Set opens up a world of possibility and learning around your home for your children. Mobile enough to move it around once attached to the LEMO Chair, it lifts your child up to the same level as their siblings and parents, giving them the chance to participate in all the things we can do together as a family: preparing meals, helping in the kitchen or brushing teeth. Quickly improving communication, dexterity and giving them the self-confidence to complete all these tasks alone.
